

Priority interventions

- Provide clear directives to army and police officials to protect, rather than regulate and harass.
- Avoid complicated licensing processes.
- Unlock the whole food system – from producers, to secondary markets, through to transporters.
- Informal vendors around the world are designing their own solutions – work alongside them.

Suggested approach

- Relief – Do no harm & direct income support.
- Recover – informal operators need income assistance to restart. Grants and credit for inputs must be extended down to these small players.
- Rebuild – address long called for infrastructural needs – paved surfaces, shelter, water and sanitation & long needed incorporation into social security systems.
- Reset to build resilience – this is our opportunity to re-imagine the cities we want.
